Click on "Permits on Public Notice" under the "Permit" banner in the middle area of the screen.

Information regarding permit decisions before the Office of the Director, workshops, training, etc., is published in the *DEQ Calendar*. The *DEQ Calendar* is available on the web at: <http://www.michigan.gov/deq>. On the left-hand side, click News & Events/Calendar.

of the Detroit River a maximum of 5.76 mgd of limestone mine dewatering water and stonewash water from the period beginning on the effective date of this permit and lasting until the discharge is redirected through the rapid-mix diffuser. During the period beginning upon discharge through the rapid-mix diffuser and lasting until the expiration date of this permit, the permittee is authorized to discharge a maximum of 5.76 mgd of limestone mine dewatering water and stonewash water to the Trenton Channel of the Detroit River. The permit includes the following modifications to the previously-issued permit. On the date of modification of the permit, the effective dates for the hydrogen sulfide and acute toxicity limitations are delayed from October 1, 2006, to September 1, 2007, to allow additional time for installation and/or regulation of the hydrogen peroxide treatment system and the rapid-mix diffuser. For total copper, the monitoring frequency is reduced from weekly to twice monthly and the effluent limitations are eliminated. The total dissolved solids monitoring requirements are removed. Effective upon redirection of the effluent through the rapid-mix diffuser: effluent limitations and monitoring requirements for dissolved oxygen are eliminated, and the monitoring frequency for total copper is reduced from twice monthly to monthly. For hydrogen sulfide, the effluent limitations are increased to 16 µg/l and 0.77 lbs/day as daily maximums, and the Pollutant Minimization Program for Hydrogen Sulfide is eliminated because the limits are no longer below the quantification level. For acute toxicity, the effluent limitation is eliminated and the water quality value is increased from 1.0 to 10.0 acute toxic units. A requirement to conduct a rapid-mix diffuser study is included. Issued January 26, 2007. **Information contact:** Jude Woodcock; 517-373-1329.

Issued January 26, 2007. **Information contact:** Alec Malvetis; 517-335-4124.

NOTICE AND PROVISIONS FOR FILING A PETITION FOR CONTESTED CASE HEARING RELATING TO ISSUANCE OF A CERTIFICATE OF COVERAGE

A person who is aggrieved by the issuance of a certificate of coverage may file a sworn petition for a contested case hearing with the Office of Administrative Hearings of the Department of Labor and Economic Growth. The sworn petition must state the conditions of the certificate of coverage, and the general permit under which it was issued, which are being challenged.

Upon the filing of a sworn petition for a contested case hearing within 60 days of the publication in the Water Bulletin of notice of the issuance of a certificate of coverage, the Office of Administrative Hearings will open a file on the matter. A sworn petition for a contested case hearing filed more than 60 days after publication, absent the showing of good cause, may be rejected by the Office of Administrative Hearings as being untimely.
